Laser Hair Removal

The Motus AY is the world's first and only laser hair removal technology to deliver two gold-standard lasers – Alexandrite and Nd:YAG in a virtually painless mode!

- Proven safety record
- Suitable for all skin colours
- Suitable for dense, coarse and thin sparse hairs
- Treatment sessions are very fast, even for large areas such as the legs or back.

How does laser hair removal work?

Light is emitted and absorbed by melanin within the hair, which is then converted to heat energy damaging the hair follicle.

What does a laser treatment feel like?

With standard laser hair removal treatments, you can feel what is described as the 'hot flick' of an elastic band during treatment. However, with the brand-new pain free Motus MOVEO treatment, you will feel little to no sensation at all. The built-in chill tip allows even more comfort for clients, especially when treating an area with lots of dense and dark hair.

How many sessions will I need?

The number of sessions required varies from client to client And depends on many factors. However, as a guideline, it is always recommended to complete a course of at least six sessions per treatment area.

How long will it take for me to see results?

Clinical studies show that clients have seen outstanding results in as little as four sessions.

Who is suitable for treatments?

Most people are suitable for treatment. We recommend a consultation with your clinician to ascertain if the treatment will be successful for you. Grey/white hair has no melanin so is not recommended for treatment.

Skin *Rejuvenation*

Boost collagen production and rejuvenate lacklustre skin to reduce the appearance of fine lines, wrinkles, pigmentation, and redness.

- Smooth wrinkles & fine lines
- Boosts collagen to lift & tighten the skin
- Reduce redness and pigmentation
- Brighten dull skin

How does skin rejuvenation work?

Pulses of light are emitted to target skin discolouration (brown and red lesions) and create a more youthful, even complexion. In addition, the laser stimulates the fibroblast cells, leading to increased production of new collagen and elastin.

This improves the texture of the skin, evening out lumps and bumps whilst reducing the appearance of lines and wrinkles. The skin will also become tighter and the appearance of scarring can be reduced.

What does a laser treatment feel like?

Treatment can be mildly uncomfortable, but no anaesthesia is required. Most people describe the discomfort as moderate and acceptable, not unlike a quick pinprick. You will also experience a warm sensation.

How many sessions will I need?

Treatments are carried out every 2 to 4 weeks and typically between 3 and 6 treatments are recommended for best results. Thereafter, top-up sessions are performed as required, usually once or twice a year.

How long will it take for me to see results?

Clinical studies show that clients have seen outstanding results in as little as three sessions.

Who is suitable for treatments?

Most people are suitable for treatment. We recommend a consultation with your clinician to ascertain if the treatment will be successful for you.

Pigmentation

Restore an uneven skin tone, for youthful and healthy-looking skin.

- Improve an uneven skin tone
- Brighten lacklustre skin
- Suitable for age spots, liver spots, sun damage and more

How does pigmentation removal work?

Short pulses of light are released and are readily absorbed by the high concentration of melanin found within pigmented lesions. The rapid absorption of light energy heats the melanin and causes the destruction of the melanin-rich cells. This triggers the body's natural healing process to stimulate the growth of new, healthy skin tissue.

What does a laser treatment feel like?

Most patients describe the discomfort as mild and tolerable and no anaesthesia is required.

How many sessions will I need?

The number of treatments will depend on the type and size of the pigmented lesion but typically 1 to 3 sessions are required at 4 to 6-week intervals.

How long will it take for me to see results?

Clinical studies show that clients have seen outstanding results in as little as 3 sessions.

Who is suitable for treatments?

Most people are suitable for treatment. We recommend a consultation with your clinician to ascertain if the treatment will be successful for you.

Large, dark, mottled or raised pigmentation cannot be treated and may need to be checked by a dermatologist. Large, dark moles should not be treated, nor should lesions covering a large part of the body. The pigmented marks that respond the best are superficial lesions such as those caused by sun damage (sun spots) and freckles.

Facial Vessels

Laser therapy is the best way to deal with your unwanted facial vessels. It reduces the number of lesions and improves the skin's condition and appearance.

- Proven safety record
- Suitable for all skin colours
- Suitable for a range of vascular lesions
- Treatment sessions are very fast,

How does the treatment work for facial vessels?

Laser energy is applied to the skin where it is readily absorbed by blood vessels, heating them to a point where they are destroyed.

Following treatment, the vessels quickly clear as they are reabsorbed by the body, leaving little or no trace of the original lesion.

What does a laser treatment feel like?

Treatment is mildly uncomfortable but there is no need for anaesthesia and the procedure is actually quite quick. Sensations vary but most describe this treatment as feeling like a very quick, hot pinprick.

How many sessions will I need?

The number of sessions required varies from client to client and is dependent on many factors however, 3-5 treatments are needed for optimum results, though small lesions may clear in just a single session. Repeat treatments are spaced every 4 to 6 weeks.

How long will it take for me to see results?

Clinical studies show that clients have seen outstanding results in the first session.

Who is suitable for treatments?

Most people are suitable for treatment. We recommend a consultation with your clinician to ascertain if the treatment will be successful for you.

Leg Vessels

Many people have Leg Spider Veins, they're those bluish-purplish lines down the sides of the legs, or around the ankles and down to the heels. The Motus AY is a great option for Spider Vein Removal.

- Proven safety record
- Suitable for all skin colours
- Suitable for a range of vascular lesions
- Treatment sessions are very fast

How does the laser treatment work?

How many sessions will I need?

The number of sessions required varies from client to client and is dependent on many factors. However, between 3-5 treatments are needed for best results depending on the type of leg vessel.

Though small lesions may clear in just a single session, repeat treatments are spaced every 6-8 weeks.

How long will it take for me to see results?

Best results are seen following a minimum course of treatments.

Who is suitable for treatments?

Most people are suitable for treatment. We recommend a consultation with your clinician to ascertain if the treatment will be successful for you.

Fungal Nail

Through the use of cutting-edge technology, the Motus AY offers a fast and effective solution to fungal nail.

- Proven safety record
- Effective and safe
- Treatment sessions are very fast

How does fungal nail treatment work?

Light is absorbed by the water in the skin underneath and around the nail, creating heat. This heat helps to destroy the dermatophytes and eliminate the fungal infection.

The laser applicator is placed on the nail and a short pulse of light is released. The entire nail bed and nail matrix is then treated in this way.

What does the treatment feel like?

A warm sensation and some discomfort are felt during treatment. However, a skin cooling device can be used to make treatment as comfortable as possible.

How many sessions will I need?

The number of treatments required varies, although typically 2-6 treatments are needed for optimum results.

How long will it take for me to see results?

Results become apparent as the nail grows out. Due to the slow rate of toenail growth it may take several months for the results to be seen.

Who is suitable for treatment?

Most people are suitable for treatment. We recommend a consultation with your clinician to ascertain if the treatment will be successful for you.
